SUMMARY

Software Engineering student building cloud-native and AI-powered products with TypeScript, Go, Python, Docker, Kubernetes, and Terraform. Experienced in microservices, distributed systems, and CI/CD.

EXPERIENCE

Engineering Intern – Bosch | Construction of Samples (CoS)

- Streamlined sample tracking and production workflows by documenting technical specifications and assisting in data-driven process improvements.
- Collaborated with cross-functional engineering teams to optimize sample-assembly workflows and reduce operational bottlenecks.

Part-Time Student – Ankara University Data Coordination | Oct 2024 – June 2026

- Support institutional data processing and management.

PROJECTS

SonaraLabs 2.0 | Jun 2026 – Present

- Engineered a web-based DAW for real-time audio manipulation via React, TypeScript, and Web Audio API.
- Built an async task queue using Hono, BullMQ, and Redis for high-load AI audio generation.
- Managed project state and audio metadata storage with MongoDB.
- Orchestrated multi-service containerized deployments using Docker.

EDUCATION

Ankara University
Software Engineering
2023-2027

Bursa Erkek Lisesi
2019 - 2023

SKILLS

- Languages: TypeScript, JavaScript, Python, Go, Rust, SQL
- Backend & Data: Express, MongoDB, Redis, BullMQ
- Cloud & DevOps: Docker, Kubernetes, Terraform, GitHub Actions, CI/CD
- Frontend & Audio: React, Vite, Web Audio API

SOFT SKILLS

- Adaptability, Problem-Solving, Flexibility, Stress Management, Technical Communication, Analytical thinking, Teamworking

HOBBIES

- Cycling, music producing/beatmaking, hiking.
